remote controlled socket

efergy®

Switching made simple!

Control an appliance or a group of appliances

Turn power points on and off remotely

Makes reducing your electricity bills easier

Simple installation and set-up

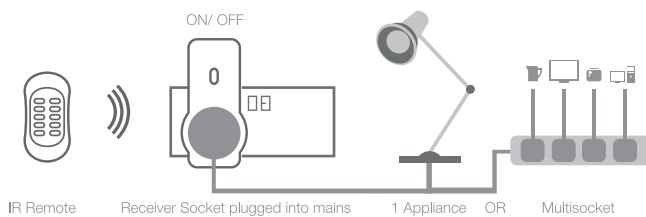

EU

UK

Our **remote controlled socket (RCS)** product allows you to turn off appliances from the powerpoint with the touch of a button, helping you to save both electricity and money. Keep the remote control in a handy place so you will remember to use it to maximise your energy savings.

Key features

- Turn power points on and off remotely.
- Makes reducing your electricity bills easier.
- Simple installation and set-up.
- Control an appliance or a group of appliances with one button press.

Switching made easy!

Simply plug the appliance or device you want to remotely operate into the receiver socket and then press the corresponding power button on the remote to operate it from afar. You can connect up to 4 appliances to the **RCS** control and switch individually or 'ALL' with a single press.

What's in the box

- 1 x Remote Controlled Socket
- 1 x Remote Control

Easy to install

1. Insert the batteries provided into the remote control.
2. Plug the **RCS** into a mains power outlet. The LED light will flash.
3. Select and press one of the ON switches on the remote control. The LED light will then flash continuously then stop.
4. The socket is now paired to this ON switch on the remote.
5. You can now remotely control the socket and any appliance connected.
