# air control

Intelligent temperature controller

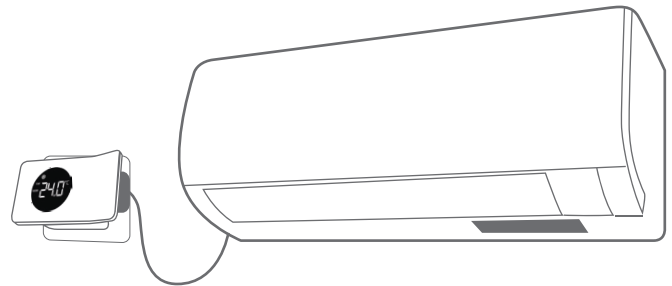

The efergy **air control** allows you to control your air conditioner and monitor its energy consumption.

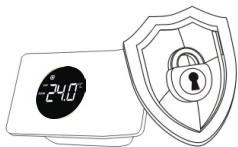

## Plug and play

Installation... Our goal is to keep it simple. Just plug in the **air control** and get started. The unit pairs to most AC units within 1 minute.

## Real-time feedback

No matter where you are you can control your air conditioning unit. You can also get up to the minute information on energy consumption as well as usage history.

## Always safe

**air control** uses a class V-0 flame retardant PC shell to keep your family away from danger. To ensure further safety the patented relay-free design is used to avoid relay failure.

## Cost saving

The **air control's** app has consumption and usage report. These reports can help you with your personal finance planning.
